

10 QUESTIONS TO ASK YOUR CONTRACT MANUFACTURER

Your contract manufacturer is arguably the most important link in your supply chain. Are they delivering in these 10 critical areas? If not, it's time to find a new partner.

1

Do you test every lot of raw material for impurities and adulterants using validated testing methods?

6

Will you provide me the documentation I need to ensure I can fulfill my GMP requirements?

2

What does your quality department look like and what is your quality process?

7

Do you have optimized environmental controls in place and do you offer cold storage?

3

Can you scale with me as I grow?

8

May I tour and /or audit your facility?

4

Can you help me develop a product that meets my marketing and consumers' needs?

9

Do you understand allergens and can you help my products meet special requirements?

5

Will you help me ensure my products are formulated to meet label claim?

10

Will you disclose the country of origin of your raw materials?
