Promises and challenges

The higher the balloon, the closer the clinical applicability

- Not a "one size fits all"
- Heritage | species | geography
- Technical limitations

Given the emerging role of microbiome research in health and disease, responsible stewardship is imperative for communicating scientific findings and trend data without misinterpretation and distortion to prevent harm to the public.

The path to hell is paved with the best of intentions...

...the road to good intentions is paved with plaintiff lawyers

Getting others to understand

History tells us that, beyond just making us feel good and entertained, storytelling can effect change

It DOESN'T MATTER HOW MUCH WE KNOW, WHAT MATTERS IS HOW CLEARLY OTHERS CAN UNDERSTAND WHAT WE KNOW.

—Steven Stork

Buttress your science communication with the scaffolding of storytelling and secure tightly with facts that matter
